

MSH

February 12, 1923.

Robinson Packing Corporation,
Anacortes, Washington.

Gentlemen:

Your statistical report of fishery operations in Alaska for the season of 1922 has just been received. In that part of the report requiring detailed statement of salmon fishing operations by localities and apparatus there is an entry for Karluk region and vicinity showing a catch by seines of 16,000 cohos, 2,107 chums, 45,525 humpbacks, and 27,000 red salmon. Please furnish at once a further statement giving in greater detail the places where these fish were taken.

Is the seine boat listed on your report the Astorian owned and operated by Anton A. Stanovich? If not, give the value and tonnage of the vessel listed. Did you purchase all of the salmon caught by Stanovich and are they included in the figures given by you on page 2 of the report?

Value of pack by species is not given. This information should be furnished.

Very truly yours,

Henry O'Malley.

Commissioner.
